## **DETAILED ACTION**

## Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-17, drawn to a process.

Group II, claims 18-26, drawn to an apparatus.

2. The inventions listed as Groups I, and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

In the present case, none of the special technical features are common to the other group.

The combination of category "Apparatus, Process" in which the apparatus does not carry the process do not fall within the permissible invention categories of PCT Rule 13.2 and 37 CFR 1.475. For example, the apparatus as recited in claim 24 is not provided to carry the process as recited in claim 1.

3. <u>Upon election of species I or II</u>, applicant is further required to one of the following disclosed species. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Application/Control Number: 10/523,669

Art Unit: 3663

The species are as follows:

A. Embodiment of figure 6.

B. Embodiment of figure 7.

4. <u>Upon election of species A or B</u>, applicant is further required to one of the following disclosed species. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Page 3

The species are as follows:

a. IS-801 (claim 6)

b. UMTS (claim 7)

c. CDMA (claim 8)

5. <u>Upon election of species a, b, or c</u>, applicant is further required to one of the following disclosed species. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

i. GSM (claim 9)

j. GPRS (claim 10)

h. TDMA (claim 11)

m. BlueTooth (claim 12)

n. IEEE 802.11. (claim 13)

Application/Control Number: 10/523,669 Page 4

Art Unit: 3663

6. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: There is no special technical feature when considered as a whole defines a contribution over the prior art of record. Such is evidenced by the PCT Search Report (see X reference in the international search report)."

- 7. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. They reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.
- 8. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The reason are the same as those set forth in section 2 above.
- 9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3663

## **Conclusions**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan C To whose telephone number is (571) 272-6985. The examiner can normally be reached on from 8:00AM to 5:00PM.
